MAURICIO ROMERO

SOFTWARE DEVELOPER

RELEVANT WORK EXPERIENCE

Viking Sasquatch, LLC

www.vikingsasquatch.com | Dec 2022 - May 2024

- **Developed Mortgage & Loan System:** Contributed to building a comprehensive system for mortgage and home equity loan applications using **React**, **TailwindCSS**, **Redux**, **TypeScript**, and **Vite**.
- **Frontend Optimization:** Created reusable components, integrated them with the backend, and performed **unit testing**.
- **Vue Migration Support:** Collaborated on the migration from Vue, optimizing frontend-to-backend calls for enhanced performance.
- **Hackathon Participation:** Developed a tax calculator in **React Native** during an internal hackathon.
- **Scrum & Collaboration:** Followed **Scrum** methodology and used **JIRA** for project management, working with the skilled Tequila team.

FirstClose

www.firstclose.com | Dec 2022 - Apr 2023 (Project)

- **Enhanced Mortgage Solution UI:** Developed and **optimized** a web-based interface for streamlining mortgage and home equity loan origination.
- **Technology Migration:** Contributed to migrating the application to ReactJS, improving functionality and **performance**.
- **Key Responsibilities:** Created visual components, implemented user interactions, and added new features using React.js, Redux.js, Sass, and JavaScript.
- **Team Collaboration:** Worked closely with the development team to align the design and functionality with user needs and project goals.

Esto Es

www.estoes.me | Apr 2022 - Dec 2022

- **Enhanced Telecom's Website:** Developed new features and maintained the institutional site using **Next.js**, **SASS**, **PropTypes**, and **MaterialUI**.
- **Streamlined Back-Office:** Improved efficiency by developing and extending the back-office with **Strapi**.
- **Migrated DossierNet:** Led the migration from CodeIgniter to Next.js, optimizing performance with server-side rendering and incremental static regeneration.
- **Design System Integration:** Contributed to creating a design system, automating Figma to component conversion, and integrating Tailwind CSS with **Figma** API.
