Mauricio Romero

Software developer en Aerolab | TypeScript, Salesforce.com, Next.js
Argentina

Extracto

I'm a software developer with experience in both frontend and backend, currently part of Aerolab. Over the past 10 months, I've been leading a team developing an internal system for endeavor.org, helping more than 40 offices worldwide access key information efficiently. My responsibilities include maintaining high technical standards in coding, performing code reviews, and managing roadmap planning and estimations.

With over 4 years of experience as an IT consultant, I bring strong skills in software development, hardware troubleshooting, and professional competence in networking — including routers, switches, firewalls, and network security. I focus on delivering tailored, high-quality solutions, working with technologies such as React, TailwindCSS, TypeScript, and Next.js to build performant and user-focused applications.

Experiencia

Aerolab

Software Developer

enero de 2025 - Present (1 año 4 meses)

Аргентина

Leading a team developing an internal system for <https://endeavor.org> to facilitate information access for staff across 40+ offices worldwide.

My role includes maintaining high engineering standards, providing technical guidance to the team, conducting code reviews, and collaborating on roadmap planning and estimations.

I also contribute to improving development workflows by incorporating AI-assisted tools and practices that support productivity, code quality, and team knowledge sharing.

Autónomo

IT Consultant

enero de 2021 - febrero de 2025 (4 años 2 meses)

As an IT Consultant working independently, I specialize in hardware troubleshooting, software development, and consulting services. My expertise includes a solid understanding of network components and concepts such as routers, switches, firewalls, IP addressing, DNS, and network security, along with basic knowledge of network architecture. I leverage my experience in hardware troubleshooting and software development to provide comprehensive IT solutions, helping clients identify their IT needs and offering recommendations for appropriate hardware and software solutions.

In addition to my consulting work, I also develop custom web applications on a freelance basis. This involves tailoring solutions to meet the specific needs of clients, using a range of technologies to ensure that the applications are effective and scalable. I continuously expand my knowledge and skills through ongoing training and certifications to provide the best possible IT services and stay current with industry trends.

Viking Sasquatch, LLC

Front End Developer

diciembre de 2022 - mayo de 2024 (1 año 6 meses)

Carolina del Norte, Estados Unidos

As a frontend developer, I follow following the Scrum methodology and using Jira as our project management platform. I'm part of the team in charge of developing a comprehensive system for mortgage and home equity loan applications.

My main responsibilities include frontend development using technologies such as React, TailwindCSS, Redux, TypeScript, Vite, and unit testing. I develop reusable components, connect them to the backend, and interpret requirements.

I'm was a member of the Tequila team, which is a group of highly skilled and friendly professionals.

FirstClose

Front End Developer

diciembre de 2022 - abril de 2023 (5 meses)

Austin, Texas, Estados Unidos

At FirstClose, my role was to develop the user interface for a web-based solution that streamlines the mortgage and home equity loan origination

process for lenders across the country. I was involved in the migration to new technologies such as ReactJS to improve the functionality and performance of the application. My responsibilities included creating visual components, implementing user interactions, optimizing the application, and adding new features.

As a developer, I leveraged technologies such as React.js, Sass, JIRA, Redux.js, and JavaScript to create an intuitive and efficient user interface for the application. I worked closely with other members of the development team to ensure that the design and functionality of the application met the needs of our users and stakeholders.

Overall, my experience at FirstClose allowed me to hone my skills in ReactJS, UI development, and project management. I gained valuable experience working with a team of developers to create a high-quality, user-friendly application that met the needs of our clients in the mortgage and home equity loan origination space.

Esto es

Frontend Developer

enero de 2022 - diciembre de 2022 (1 año)

As a Front End Developer at EstoEs, I was responsible for the development of new features and maintenance of the institutional website for Telecom. In this role, I utilized various cutting-edge technologies such as Next.js, SASS, PropTypes, and MaterialUI. One of my key achievements was the development and extension of the back-office using Strapi and other technologies, which helped streamline the process and improve overall efficiency.

I also played a pivotal role in the initial stages of the DossierNet migration project from CodeIgniter to Next.js. Here, I leveraged Next.js, MaterialUI, Styled Components, TypeScript, and several other technologies. Given the target audience and goals of this project, we prioritized performance, utilizing Next.js features such as the Image component, server-side rendering, and incremental static regeneration. We also focused on modularity and scalability, using it as a boilerplate for other similar projects, resulting in rapid development.

Finally, I was a part of a cross-functional team at Telecom, where we explored the development and implementation of an integral design system. This

involved automating the implementation of Figma designs into agnostic components. We utilized the Figma API to retrieve data, creating a customized configuration for Tailwind CSS. Additionally, we advanced the implementation of a multiple configuration system based on web components and Figma designs.

Throughout my time at EstoEs, I worked with a variety of technologies such as React, Redux, GraphQL, and MongoDB, among others. I consistently strived to stay up-to-date with the latest trends and advancements in the industry, ensuring the best possible outcomes for every project.

Autónomo

IT Support

enero de 2010 - abril de 2022 (12 años 4 meses)

Argentina

As an IT Support Technician for 10 years, I provided essential support in various technical areas. My responsibilities included basic network troubleshooting, diagnosing hardware problems, and configuring and repairing computer systems.

I demonstrated strong technical knowledge and proficiency in various hardware and software technologies. I was able to identify and resolve issues related to operating systems, applications, and hardware components. My expertise allowed me to provide effective solutions for technical problems while ensuring that client systems were up and running with minimal downtime.

In addition to my technical skills, I was able to communicate technical concepts to non-technical clients effectively. I provided clear and concise instructions, troubleshooting steps, and technical advice, making it easier for clients to understand the technical issues and solutions.

Overall, my experience as an IT Support Technician has honed my technical expertise and communication skills, allowing me to provide effective and efficient support to clients.

Alkemy

React Front-end Developer

octubre de 2021 - diciembre de 2021 (3 meses)

Argentina

During my time at Alkemy, I was involved in a training contract where I worked on developing a website for a non-governmental organization (NGO) in a group setting. The website was a complex project that included a blog, a back office, and landing pages for special occasions. Throughout the project, we followed the Scrum methodology to ensure that the project was completed efficiently and effectively.

As a member of the development team, I worked primarily with React to develop the website's front-end. I was responsible for implementing design elements and ensuring that the website was responsive and user-friendly. I also collaborated with other team members to ensure that the website met the client's requirements and specifications.

Overall, my experience at Alkemy allowed me to develop my skills in React, Scrum methodology, and project management. I learned to work collaboratively with others to achieve common goals and to ensure that the end product met the client's needs and expectations.

Walter Moro E Hijos

Machine Operator

junio de 2017 - agosto de 2019 (2 años 3 meses)

Las Parejas, Santa Fe, Argentina

As a machine operator in an industrial machining setting, I operated various machines, including a parallel lathe, to produce machined parts used in the manufacturing of seed drill boxes. I was responsible for setting up and operating the machines to produce parts to the required specifications.

My role required me to have a strong technical understanding of machining processes and the ability to interpret technical drawings and specifications. I worked with a range of materials, including metals and plastics, and used a variety of cutting tools and techniques to produce high-quality parts.

In addition to my technical skills, I was able to work effectively in a team environment. I collaborated with other operators and supervisors to ensure that production targets were met, and that work was completed on time. I was also responsible for maintaining and cleaning my equipment, ensuring that it was in good working order and ready to use.

Furthermore, I was able to develop and manufacture custom parts to meet specific customer requirements. This required me to have strong problem-

solving skills and the ability to work with customers to understand their needs and translate them into technical specifications.

Overall, my experience as a machine operator in an industrial machining setting has developed my technical skills, attention to detail, ability to interpret technical specifications, and my ability to work effectively in a team environment.

Acerias 4c

Industry operator

febrero de 2013 - marzo de 2015 (2 años 2 meses)

Las Parejas

In my role, I was also responsible for ensuring that the sand cores were free of defects and were of high quality. I followed strict quality control procedures to ensure that the sand cores met the required standards and would produce high-quality castings.

Additionally, I worked in a fast-paced and physically demanding environment, which required me to be in good physical condition and able to stand for extended periods. I also followed strict safety protocols to ensure my safety and the safety of my colleagues at all times.

Overall, my experience as a metal industry operator has developed my technical skills in sand core creation, attention to detail, quality control, and my ability to work in a fast-paced and physically demanding environment.
